[OFFICIAL POLICE COMMISSION BRIEFING]

THE ALIBI

A Daily Satirical 1980s Retro CRT Noir Detective Micro-Crime Game

[!] LIVE POLICE WIRE WIRE-TAP • MULTI-AGENT AI SYSTEM
AUTONOMOUS LLM SUSPECTS • PROCEDURAL PIXEL ART PORTRAITS

LOCAL OLLAMA (LLAMA 3.1) | GROQ CLOUD (500 TOK/S) | CHROMADB RAG | FASTAPI + TEXTUAL TUI

[01 : VISION & GAMEPLAY]

THE PREMISE & CORE VISION

A satirical noir detective game with a daily habit loop.

- **The Daily Micro-Crime:** Every 24 hours at midnight local time, a bizarre micro-crime occurs (e.g., swapping ancient Roman spoons for neon plastic sporks, reprogramming clocktower cuckoos to scream like roosters).
- **The Interrogation Table:** You sit across from an eccentric guilty suspect with a compulsive speech quirk and a fabricated cover story.
- **Question Token Economics:** You start with **5 Question Tokens**. Every interrogation costs 1 token. You must interrogate smartly and corner them into an undeniable contradiction.
- **The Viral Habit Loop:** One shared global daily case, Wordle-style investigation teletype share grids, and high-stakes detective streak scores.

Authentic 1980s Retro CRT Terminal Main Menu & Difficulty Protocol Selector

[02 : SYSTEM ARCHITECTURE]

5-AGENT AUTONOMOUS AI ECOSYSTEM

1. CASE ARCHITECT AGENT

Procedurally generates solvable micro-crimes, immutable 3-fact dossiers, true timelines, and guaranteed catchable weak points seeded daily.

2. SUSPECT AGENT

Autonomous persona agent. Internalizes cover stories, tracks speech quirks, maintains lie consistency, and projects emotional states (calm, nervous, rattled).

3. CLAIM EXTRACTOR AGENT

Synthesizes spoken answers into atomic subject-predicate-object claims logged into ChromaDB RAG for instant retrieval.

4. CONTRADICTION JUDGE

Strict legal evidentiary judge. Uses Chain-of-Verification (CoV) to enforce direct physical mutual exclusivity between testimony and facts.

5. NOIR NARRATOR AGENT

Hardboiled 1980s narrator. Evaluates detective performance, delivers cryptic case hints, and writes courtroom verdicts.

[03 : INVESTIGATION WORKFLOW]

THE CLASSIFIED CRIME DOSSIER

Before stepping into the interrogation room, inspect the facts.

- **Immutable Forensic Truths:** The police crime lab provides exactly 3 verified forensic facts that cannot lie (e.g., serial stamped gears, mud bootprints, audio cassettes).
- **Procedural Pixel Suspect Portraits:** Generated dynamically by the custom Alibi Character Kit based on physical traits (hair, trench attire, monocles).
- **Quirk Briefing:** Highlights the suspect's compulsive speech mannerisms to help you detect nervousness and slips.

Classified Briefing: Suspect Mugshot, Physical Traits, & Immutable Dossier

[04 : THE INTERROGATION ROOM]

LIVE WIRE INTERROGATION TABLE

Direct, unscripted neural dialogue with the suspect.

- **Live Dialogue Wire:** Every question typed is processed through the local neural LLM, generating real-time in-character responses.
- **Nervousness Cues & Audio:** Suspect emotional shifts trigger audio clicks and CRT expression updates when pressed on weak points.
- **Coin Token Tracker:** Authentic pixel-art token coins indicate remaining interrogation stamina, flashing critically when depleted.
- **Cryptic Noir Hints:** When stuck, spend 1 token to request guidance from the Hardboiled Noir Narrator.

Interrogation Wire: CRT Monitor, Pixel Portrait, Tokens, & Dialogue Transcript

[05 : THE CORE PUZZLE]

THE CONTRADICTION INDICTMENT

Pair a suspect quote directly against an immutable fact.

- **Point-and-Click Indictment:** Select the exact quote from the suspect's transcript and the conflicting dossier fact.
- **Strict Chain of Verification:** The Contradiction Judge checks mutual exclusivity: can both Claim A and Claim B coexist in physical reality?
- **Zero Sycophancy:** Circumstantial suspicion is NOT enough. If the suspect didn't make a direct, physically impossible assertion, the judge rules INVALID.
- **Penalty Token Enforcement:** False accusations penalize 1 token (2 on Hardboiled). Run out of tokens, and you lose!

Accusation Indictment: Selecting Contradictory Quotes & Immutable Evidence

[06 : THE PAYOFF]

VERDICT COMMENDATION & CONFESSION

Watch the suspect's story crumble in dramatic fashion.

- **Breakdown Confession:** Cornered suspects deliver hilarious in-character breakdown confessions admitting their micro-crime.
- **Rubber-Stamped Verdict Badge:** Officially stamps [CONVICTED] or [WALKED FREE] across the suspect's mugshot.
- **Detailed Scoring Ledger:** Awards Base points (+1,000), Token conservation (+250/token), Speed bonus (+500), Flawless bonus (+250), and daily streak multipliers.
- **Wordle-Style Share Grid:** Generates formatted emojis teletype to copy and challenge friends.

Result Commendation: Rubber Stamp, Confession, & Score Ledger

[07 : PERSISTENCE & PROGRESSION]

CAREER MEMORY & DAILY LOCKOUT

Strict 1-attempt-per-day rule with lifetime detective rank progression.

- **Daily Case Lockout:** Once today's case is played, it cannot be re-investigated. The menu locks and displays a live countdown timer to the next midnight case.
- **Concluded Review Screen:** Re-inspect your score breakdown, teletype record, and copy results without corrupting game state.
- **Detective Rank Hierarchy:** Progress from Patrol Officer to Senior Inspector and Chief of Detectives (Grade I).
- **Cold Case Archives:** Replay historical crime dossiers for practice without affecting your active streak.

Daily Lockout Modal: Case Statistics, Midnight Timer, & Teletype Record

[08 : TECHNOLOGY STACK]

TOOLS & TECHNOLOGIES USED

AI INFERENCE & LLMS

- **Ollama** (Local on-device Llama 3.1 8B)
- **Groq Cloud API** (500 tok/sec cloud fallback)
- Zero external API dependency required.

RAG & VECTOR SEARCH

- **ChromaDB** on-disk vector database
- **Nomic Embed Text** local embeddings
- Dynamic session-scoped collection namespaces.

BACKEND SERVICES

- **Python 3.13** clean virtual environment
- **FastAPI & Uvicorn** async ASGI server
- **Pydantic v2** rigorous JSON validation.

RETRO FRONTEND & UI

- **Vanilla JS + CSS Grid** (zero bloat)
- **Textual & Rich** terminal TUI & CLI
- Hardware-accelerated CRT scanlines.

GRAPHICS & AUDIO

- **Pillow (PIL)** procedural pixel portraits
- **Web Audio API & Pygame** sound effects
- Atmospheric WAV background music loops.

DEV OPS & QUALITY

- **Pytest** automated test suite (39 tests)
- **Git & GitHub** remote version control
- **LocalTunnel** public HTTPS edge tunnel.

[09 : VERIFICATION & RELIABILITY]

AUTOMATED VERIFICATION & QA

Rigorous test engineering ensuring 100% deterministic reliability.

- **39 Automated Test Cases:** 100% passing test suite across unit, integration, and UI pilots.
- **Strict Contradiction Benchmarks:** Tested against tricky circumstantial claims (tea vs yarn $\to$ INVALID; walking past store $\to$ INVALID; absolute denial $\to$ VALID).
- **Pydantic Schema Normalization:** Custom pre-validators handle arbitrary LLM casing, whitespace, and aliases gracefully.
- **Fail-State & Token Auditing:** Guaranteed deduction of tokens on failed accusations and proper defeat states.

Cold Case Archives: Career Stats, Streak Tracking, & Case Registry

[10 : SUMMARY & HIGHLIGHTS]

PROJECT HIGHLIGHTS

AUTHENTIC THEMATIC COHESION

Every visual element, sound effect, and narrative tone adheres strictly to the 1980s retro CRT noir atmosphere. No emojis, no modern generic design.

INTELLECTUAL RIGOR

Unlike typical AI chat toys that agree with anything, the Contradiction Judge holds the player to strict legal standards of proof with real stakes.

DUAL DEPLOYMENT MODES

Play seamlessly in your terminal via the Textual/Rich TUI, or in any web browser via the FastAPI CRT noir interface.

ZERO-COST PRIVATE DEPLOYMENT

Runs 100% on-device on consumer hardware with local Ollama, with zero cloud API costs or privacy leaks.

[11 : ACCESS & DEMO]

LIVE ACCESS & RESOURCES

WEB APPLICATION (LOCAL)

URL: http://127.0.0.1:8000
Launch web interface with real-time audio and CRT monitor.

PUBLIC CLOUD TUNNEL

URL: https://six-shoes-lead.loca.lt
Live public tunnel access for external evaluation.

TERMINAL CLI / TUI

python run.py (Textual TUI)
python run.py --cli (Lightweight CLI)
python run.py --cli --practice (Practice Mode)

GITHUB REPOSITORY

Remote: github.com/siddhimishra20/the-alibi
Complete open-source code, test suites, and documentation.
